PROFESSIONAL SUMMARY

Data Engineer with expertise in SQL, Python, Power BI, Data Modelling, ETL pipelines, Machine Learning and analytics, complemented by software and web application development. I build scalable, data-driven solutions that transform complex data into actionable insights and user-friendly applications that create measurable business value.

CORE COMPETENCIES

• ETL/ELT & Data Pipelines • SQL Database Management • Data Analytics & Business Intelligence • Executive Reporting & Data Storytelling • Project Planning & Coordination • Data Transformation & Integration • Software & Web Application Development • API Development • Data Quality & Governance • Business Process Improvement • Python Development • Power BI and Data Visualization

TECHNICAL SKILLS

Analytics & Business Intelligence: SQL, Python, Power BI, Advanced Microsoft Excel

Data Engineering: ETL/ELT (Apache Airflow), Data Modelling, Data Warehousing, Data Lakes, Data Transformation, Apache Spark, Hadoop, Kafka, Docker.

Software & Web Development: Python, Javascript, node.js, React, Typescript, Next.js, Flask, Django, Rest APIs, HTML and CSS.

Cloud & Big Data: AWS & Google Cloud Platform (GCP)

Tools & Methodologies: Git, GitHub, Agile, Scrum

Machine Learning: TensorFlow, PyTorch, Scikit-learn

WORK EXPERIENCE

APPMART INTERGRATED LIMITED (Fintech) – FCT ABUJA, NIGERIA

Lead, Data Analytics Unit | Dec. 2024 – Present

- Lead a cross-functional team of analysts and engineers in delivering enterprise data and analytics initiatives that support executive decision-making, operational efficiency, and business growth.
- Develop and implement scalable data pipelines, analytical models, and interactive dashboards that provide actionable insights across multiple business functions.
- Integrate structured and unstructured data from APIs, third-party platforms, and enterprise databases into centralized data warehouses and data lakes to improve data accessibility and reporting.
- Design data models and reporting frameworks that enhance business performance monitoring, KPI tracking, and strategic planning.
- Establish data governance standards, quality assurance processes, and compliance controls to improve data accuracy, integrity, and regulatory adherence.
- Automate data workflows using Apache Airflow and related technologies, reducing manual processes and improving data delivery efficiency by 45%.
- Collaborate with business leaders, software engineers, and operational teams to translate business requirements into scalable analytical solutions and data-driven recommendations.
- Produce executive-level reports and dashboards that communicate complex analytical findings into clear insights for strategic and operational decision-making.
- Drive the adoption of modern analytics technologies and AI-enabled tools to improve productivity, reporting efficiency, and enterprise-wide data management.

IBADAN ELECTRICITY DISTRIBUTION COMPANY (IBEDC) – Ibadan, Oyo State

Management Information System (MIS) Support / Data Analyst (July 2023 – Dec. 2024)

- Conducted strategic analysis of large operational datasets using SQL, Python, Excel, SPSS, and Power BI to identify trends, improve business performance, and support management decision-making.
- Developed automated ETL processes and reporting solutions that reduced manual data processing by 30% while improving reporting accuracy and efficiency.
- Performed data extraction, transformation, and analysis using SQL and Python to support operational reporting and business intelligence initiatives.
- Produced management reports, dashboards, and analytical insights to monitor operational performance, revenue assurance, and customer service metrics.
- Strengthened revenue assurance by validating debt factoring, direct payments, and account adjustments against source documentation, ensuring financial accuracy and operational compliance.
- Maintained data quality through validation, cleansing, and integrity checks on enterprise customer

management systems (CMS), improving the reliability of business information.

- Supported operational teams by monitoring bill delivery performance through SMS and e-billing channels and resolving data-related issues affecting customer communications.
- Collaborated with Finance, Operations, Customer Service, and other business units to deliver cross-functional analytical solutions aligned with organizational objectives.

FLAWLESS TECHNOLOGY – Remote

Full-Stack Software Engineer | *Aug. 2023 – Feb. 2025*

- Designed, developed, and maintained scalable full-stack web applications using JavaScript, React, Node.js, Express.js, and RESTful APIs.
- Built responsive, user-friendly frontend interfaces with React, implementing reusable components, state management, form validation, and API integrations.
- Developed secure backend services and server-side application logic using Node.js and Express.js, including authentication, authorization, and user management.
- Designed and integrated RESTful APIs to support web and mobile applications, ensuring reliable communication between frontend, backend, and external services.
- Designed database schemas, implemented data models, and optimized queries using PostgreSQL, MySQL, and MongoDB.
- Implemented authentication and security mechanisms using JWT, OAuth, role-based access control, and secure API practices.
- Integrated third-party services including payment gateways, email services, and external APIs to extend application functionality.
- Deployed and maintained web applications on AWS, DigitalOcean, and shared hosting environments, using Docker, Nginx, and CI/CD pipelines.
- Collaborated with cross-functional teams to translate product requirements into scalable application features and efficient technical solutions.
- Performed code reviews, debugging, testing, and performance optimization to maintain secure, reliable, and scalable applications.
- Developed internal dashboards and business tools for data processing, reporting, workflow automation, and operational monitoring.

TOUN MEMORIAL SPECIALIST HOSPITAL – Ibadan, Oyo State

Clinical Data Analyst | *May 2022 – May 2023*

- Collected, validated, and analyzed clinical data from electronic health records, medical databases, and research sources to support evidence-based decision-making.
- Applied SQL, Python, and statistical techniques to identify healthcare trends, performance indicators, and opportunities for quality improvement.
- Collaborated with clinicians, researchers, and administrative teams to translate analytical findings into actionable recommendations for clinical operations and patient care.
- Implemented data quality assurance procedures that improved the accuracy, consistency, and reliability of healthcare information.
- Prepared analytical reports and performance summaries to support clinical research, operational planning, and management decision-making.
- Ensured compliance with healthcare data governance, privacy regulations, (e.g., HIPAA) and confidentiality standards in the management of patient information

PREMIER STONE NIG. LTD., NASARAWA STATE. – Akwanga, Nasarawa State

Data and Business Intelligence Analyst | *December 2019 – August 2022*

- Conducted business and operational analysis to support strategic decision-making and improve organizational performance through data-driven insights.
- Collected, cleaned, and transformed large datasets using SQL, Python, and Microsoft Excel to improve data quality and analytical accuracy.
- Developed interactive Power BI dashboards, reports, and visualizations that enabled management to monitor key business metrics and performance indicators.
- Designed business intelligence reporting frameworks and data governance practices that strengthened data consistency, reporting reliability, and information security.
- Performed market and operational trend analysis to identify opportunities for process improvement and

organizational efficiency.

- Prepared executive reports, presentations, and analytical summaries that translated complex data into actionable business recommendations for senior management.

FIRST BANK OF NIGERIA, FCT, ABUJA (Contract) – FCT, Abuja

Financial Transaction Officer | *May 2019 – Dec. 2019*

- Processed all financial transactions for customers.
- Processed cheque lodgment for local and central clearing.
- Ensured customers' complaints and resolved it in timely basis.
- Sensitized and migrated customers to alternative channels.
- Processed bulk cash and transactions.

NIGERIAN NATIONAL PETROLEUM CORPORATION, NNPC ABUJA – FCT Abuja.

Cost Estimator – Internship | 2016

- Represented data on excel and Microsoft word for proper documentation.
- Receive and kept records of files from other departments.
- Surveyed material's price for accurate estimation.

EDUCATION

FEDERAL UNIVERSITY OF TECHNOLOGY MINNA, NIGER STATE, NIGERIA.

Bachelor of Engineering in Mechanical Engineering (July 2017)

VERITAS UNIVERSITY, FCT ABUJA, NIGERIA.

Masters of Science in Computer Science – In-view

CERTIFICATION

- Microsoft Certified: Azure Data Scientist Associate (2023)
- IBM Data Engineering Professional Certificate (2023)
- Chartered Institute of Project Management and Facility Management CIPM (2018)

AWARD

- Chevron Medical and Engineering Professional Scholarship (CMEP) – 2014
- Best Staff of the Year, MIS Unit, Ibadan Electricity Distribution Company - 2023
