PROFESSIONAL SUMMARY

5 years experienced software engineer specializing in Data and Artificial Intelligence with strong expertise in designing, developing, and deploying intelligent, data-driven solutions. Skilled in transforming complex data into actionable insights and building scalable ML/AI systems that improve business performance.

CORE COMPETENCIES

- Cost-Benefit Analysis • Communication Skills • Problem-Solving • Critical Thinking
- Data Analysis • Analytical Skills • Time Management • Project Management • Collaboration and Teamwork
- Data Governance and Protection

SKILLS

- Data Analysis and Visualization (Power BI & Tableau) • Predictive Modeling • Programming (Python, R, SQL, NoSQL, Java) • Big Data Technologies • Statistical Analysis • Data Cleaning and Processing • Natural Language Processing • Deep Learning • Cloud Computing (AWS, GCP) • Agile Methodologies.
-

WORK EXPERIENCE

APPMART INTERGRATED LIMITED (Fintech) – FCT ABUJA, NIGERIA

Lead, Data Analytics Unit

(Dec. 2024 – Present)

- Lead a team of analysts and engineers to develop and implement scalable data pipelines and dashboards, enhancing decision-making across departments.
- Integrate structured and unstructured data from a variety of sources (APIs, third-party vendors, and databases) into data lakes and warehouses.
- Design and implement data models and schemas to support high-performance querying and analysis, ensuring that data is organized efficiently.
- Define data governance standards, ensured data quality and compliance, and collaborated with cross-functional teams to drive actionable insights through advanced analytics and reporting.
- Automate data workflows using Apache Airflow or similar tools to ensure timely and accurate delivery of data.
- Implement data validation and monitoring processes to ensure data integrity and quality. Build alerts and dashboards to track data pipeline performance and reliability.
- Work closely with software engineers and business teams to ensure data is formatted correctly for their needs and provide insights into data-driven decision-making.

- Spearhead the adoption of modern data tools and platforms, improving processing efficiency by 45%
- Ensure all data practices adhere to regulatory requirements, privacy policies, and security best practices

FLAWLESS TECHNOLOGY– Remote

Software Engineer (Python)

(Aug. 2022 – Feb. 2025)

- Designed, developed, and maintained scalable backend services using Python, Django, Flask, and RESTful API principles.
- Built robust server-side logic, authentication systems, and secure user management modules using Django Auth, JWT, and OAuth.
- Developed and integrated REST APIs to support web and mobile applications, ensuring high performance and low latency.
- Implemented database models, schema migrations, and optimized queries using PostgreSQL, MySQL, SQLite, and Django ORM/SQLAlchemy.
- Deployed backend services to AWS, DigitalOcean, and shared hosting environments, using Docker, Nginx, Gunicorn, and CI/CD pipelines.
- Collaborated with cross-functional teams to transform product requirements into efficient backend workflows and data-driven features.
- Integrated third-party services such as payment gateways, email services (SendGrid, SMTP), and external APIs.
- Performed code reviews, debugging, and performance optimization, ensuring secure, maintainable, and scalable backend codebases.
- Created internal tools and dashboards for data processing, reporting, and automation using Python scripts and Django admin customization.

IBADAN ELECTRICITY DISTRIBUTION COMPANY (IBEDC) – Ibadan, Oyo State

Management Information System (MIS) Support / Data Analyst

(July 2023 – Dec. 2024)

- Conducted comprehensive data analysis on large datasets using SQL, Python, and Power BI to identify trends and patterns, leading to actionable business insights.
- Developed and maintained automated data pipelines for efficient data extraction, transformation, and loading (ETL) processes, reducing manual effort by 30%.
- Executed scripting for data extraction from database to optimize report generation using Python and SQL.
- Ensured revenue assurance by confirming debt factored, direct payment, and account adjustment against source documents.
- Provided general operational support for users of Customer Relationship Management CMS.
- Ensured data integrity by checking for the correctness of input data on CMS.
- Performed data quality assessments and data cleansing procedures to ensure accuracy and reliability of analytical findings.
- Confirmed delivery of Bill Summary via SMS and e-Bills via email to customers.
- Performed other Ad-hoc assignments as defined by Lead, MIS/ Operations Support.
- Collaborated with cross-functional team (finance, operation, customer service) to align MIS initiatives with overall company goals.

TOUN MEMORIAL SPECIALIST HOSPITAL – Ibadan, Oyo State

Clinical Data Analyst

(May 2022 – May 2023)

- Collected and compiled data from various sources, including electronics health record (EHRs), clinical trials and medical databases.
- Implemented data quality control processes to identify and resolve data discrepancies or errors.
- Analyzed clinical data to identify trends, patterns and correlations using statistical techniques and data analysis tools like SQL and python.
- Collaborated with multidisciplinary teams to interpret and explain data result and provide recommendation for clinical practice or research project.
- Adhered strictly to data privacy regulations (e.g., HIPAA) and maintain confidentiality and security of patient health information.
- Participated in interdisciplinary team meetings and provide data-driven insight to support clinical decision-making and quality improvement initiatives.

PREMIER STONE NIG. LTD., NASARAWA STATE. – Akwanga, Nasarawa State

Data and Business Intelligence Analyst

(December 2019 – August 2022)

- Conducted statistical analysis to support business decisions and provided data-driven recommendations to stakeholders.
- Filtered and cleaned datasets using spreadsheet, SQL and Python.
- Provided reports, charts and slides to backup analysis.
- Utilized power BI in creating interactive dashboards and visualizations to effectively communicate data findings to management and team members.
- Drafted strategic business intelligence road-map, complete with data governance policies and tactical information safeguards.
- Created data frames, filter big datasets and performed business analysis from multiple data sources.
- Designed customized data collection models for specific visualization task.

FIRST BANK OF NIGERIA, FCT, ABUJA (Contract) – FCT, Abuja

Financial Transaction Officer

(May 2019 – Dec. 2019)

- Processed all financial transactions for customers.
- Processed cheque lodgment for local and central clearing.
- Ensured customers' complaints and resolved it in timely basis.
- Sensitized and migrated customers to alternative channels.
- Processed bulk cash and transactions.

NIGERIAN NATIONAL PETROLEUM CORPORATION, NNPC ABUJA – FCT Abuja.

Cost Estimator – Internship

2016

- Represented data on excel and Microsoft word for proper documentation.
- Receive and kept records of files from other departments.
- Surveyed material's price for accurate estimation.

EDUCATION

FEDERAL UNIVERSITY OF TECHNOLOGY MINNA, NIGER STATE, NIGERIA.

Bachelor of Engineering in Mechanical Engineering (July 2017)

VERITAS UNIVERSITY, FCT ABUJA, NIGERIA.

Masters of Science in Computer Science – In-view

CERTIFICATION

- Microsoft Certified: Azure Data Scientist Associate (2023)
- IBM Data Engineering Professional Certificate (2023)
- Introduction of Statistically Packages: Data Analysis with Excel (2021)
- Communication and Interpersonal Skills at work (2020)
- Basics of Social Media Marketing (2020)
- Chartered Institute of Project Management and Facility Management CIPM (2018)

VOLUNTEER EXPERIENCE

INDEPENDENT NATIONAL ELECTORAL COMMISSION – Maraba, Nasarawa State

Ad-hoc Staff (February 2018)

- Acted as the presiding officer during the 2018 General Election Day in Nigeria, where I carried out activities like polling, sorting, and counting of votes, as well as the announcement of the polling unit's election result(s).

SCHOOL OF ENGINEERING – Federal University of Technology Minna

President (May 2016– June 2017)

- Provided strategic direction and vision for the department, aligning its goals and objectives with its overall mission and strategic plan.
- Developed and implemented departmental plans, initiatives, and budgets to achieve the students' society goals.
- Ensured that departmental resources are allocated effectively.
- Monitored and analyzed performance data to identify areas for improvement.

CONFERENCE

- International Conference on wearable Technology, Industrial Electronics and Electrical Engineering (ICWTIEEE) - 2015
- International Conference on Industrial Engineering and Production Technology (ICIEPT) – 2015
- International Conference on Automobile & Mechanical Engineering (ICAME)

AWARD

- Chevron Medical and Engineering Professional Scholarship (CMEP) – 2014
- Best Staff of the Year, MIS Unit, Ibadan Electricity Distribution Company - 2023
